INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/009573

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Document 4 discloses a management device (corresponding to the "terminal device" of the present application) having mail message-receiving means, which transmits a mail message list (list of items) when a mail message list acquisition request command is received, and transmits a selected electronic mail message (specified item) when a mail message selection command selecting a mail message from said mail message list is received.

Here, it is not clear whether the transmission of commands and responses to commands is carried out using electronic mail, but document 1 discloses a feature wherein commands and responses thereto are transmitted using electronic mail.

Further, the designation of telephone directories, histories of transmissions sent/received, and schedule data as the content to be acquired from a remote location is merely a feature fittingly determined by a person skilled in the art.

Moreover, in the invention disclosed in document 4, the mail message list is prepared beforehand and stored, but a person skilled in the art could easily conceive of dynamically generating said list after the receipt of a mail message list acquisition request command.

Claim 2

The invention set forth in claim 2 does not involve an inventive step in the light of documents 1, 2, and 3 cited in the international search report and document 4 newly cited in this international preliminary examination report.
